

iRobot® Braava™

Floor Mopping Robot

iRobot Braava Floor Mopping Robot
dry or damp mops virtually any hard-floor surface with disposable or reusable microfiber cleaning cloths. Designed for quick cleaning, Braava systematically covers your entire floor in a single pass.

Two models of Floor Mopping Robots allow you to choose the best robot for your home:

- **Two Cleaning Modes for Damp And Dry Cleaning:** Uses either disposable cleaning cloths, including Swiffer® brand or Braava's specially designed reusable microfiber cloths.
- **Whisper-Quiet:** Quiet motors, soft-touch bumper and careful system design enable the robot to operate without disrupting your daily activity or sleep.
- **Returns To Where It Started:** When Braava is done cleaning, it returns to the place where it started and powers down automatically.
- **Cleans All Hard Floor Types:** Braava works on all hard-surface floors including tile, vinyl, hardwood and laminate.
- **Pause/Resume:** The robot retains a map of its cleaning space so that you can replace the cleaning cloth mid-cycle and it won't miss a spot.
- **Tracks Where It Cleans:** The NorthStar® Navigation System works like an indoor GPS that helps Braava keep track of where it has been and where it needs to go.
- **Cleans A Large Coverage Area In A Single Cleaning Cycle:** For bigger homes, additional NorthStar® Navigation cubes can be purchased for Braava 380 to expand Braava's dry mopping capabilities.
- **Cleans Under Furniture:** Because of its compact size, Braava can clean under sofas and tables and get into tight areas where other cleaners can't.
- **Follows The Wall:** Wall-Following Technology allows Braava to clean dust and dirt right along walls, baseboards and edges.
- **Won't Hurt Furniture:** A soft-touch bumper cushions the contact made between Braava and walls, furniture and other objects.
- **Avoids Stairs and Rugs:** Smarts sensors, including cliff-detection sensors, help Braava avoid stairs, area rugs and raised transitions to carpets.
- **Easy To Carry:** Braava has a convenient handle for easy pick-up.
