

# iRobot® Roomba® Vacuum Cleaning Robot

**The iRobot Roomba® 800 Series, with the revolutionary new AeroForce™ Performance Cleaning System, cleans floors like no vacuum has ever cleaned before. The patent-pending cleaning system removes up to 50% more dust, debris and hair from your floors by eliminating traditional bristle brushes, instead using AeroForce Extractors that offer even better performance and are virtually maintenance-free.**

The AeroForce System, a patent-pending technology, features:

- Brushless, counter-rotating **AeroForce Extractors** break down debris and lift dirt, while requiring less maintenance.
- **Suction Amplification**, which results from the acceleration of airflow between the AeroForce Extractors.
- A brushless **High-Efficiency Vacuum** to maximise vacuum power and the new **XLife Battery** for optimised robotic cleaning effectiveness.

These technologies result in greater performance and a cleaner floor.

Roomba 800 Series:

- Removes up to 50% more dirt, dust, hair and debris.
- Uses a 5x more powerful vacuum than previous Roomba models.
- Holds 60% more dirt in the high capacity bin.
- Is virtually maintenance free – AeroForce Extractors eliminate tangled hair.
- Delivers double the cleaning cycles over the life of the robot with the XLife Battery.

Familiar Roomba features optimise the Roomba 800 Series:

- Dirt Detect Series 2 finds dirt and debris, focusing extra cleaning where it's needed most.
- Persistent Pass Cleaning Method employs a back and forth pattern to apply elbow grease in dirtier areas.
- HEPA filter enables fine debris capture.
- Virtual Wall® barriers can be used to confine Roomba to clean a specific room or area.
- Virtual Wall® Lighthouses automatically guide Roomba through room-to-room cleaning.
- Automatic docking returns Roomba to its Home Base® to dock and recharge between cleaning sessions.
- Scheduling, so Roomba cleans on its own up to 7 times per week.
